Objective

B.Tech Computer Science (Data Science) student seeking an internship where I can use my technical skills and learn more about data science through practical projects and contribute to real-world data projects. .

Technical Skills

Languages :- Python, Sql .

Frameworks :- Django, Flask .

Developer Tools :- Git, Google Colab, Vs Code, Google Cloud Platform, Power Bi .

Libraries :- pandas, numpy, matplotlib .

Experience / Academic Projects

AI-Powered Code Review Assistant | Python, Flask, Django, OpenCV , pandas, SQL

Developed a web app to automate code quality suggestions and bug detection for developers

- Integrated Git repository support for live code scanning and complexity tracking.
- Improved debugging efficiency by 25% through real-time issue tracking
- Generated productivity reports and identified reusable code patterns for teams.

May2024

Personal Finance Dashboard with Data Visualization | Python, Flask, pandas, matplotlib, SQL

Built a full-stack financial dashboard to visualize income, spending, and trends.

- Automated CSV uploads and categorized 1,000+ transactions via backend logic
- Designed interactive charts and filters to display monthly insights
- Integrated budget alerts and predictive analytics for future expense forecasting.
